REGULATORY INFORMATION

For information on the regulatory status of this product, please consult the regulatory data sheet (RDS).

FIELD OF USE

This product is a cosmetic ingredient. It is recommended for use in cosmetic formulations.

This ingredient must be used according to appropriate regulations. Gattefossé accepts no responsibility for the use of this product in applications other than those recommended.

USES

Isolated cells processed from fresh Kiwi fruits. These cells have an elongated shape and medium size (80µm). Kiwi is among the fruit with the highest antioxidant potential mainly for its scavenging effect of hydroxyl anions. It is ideal for preventive care products such as anti-age and antipollution. The suggested level of use of Fresh Cells Kiwi PFE is 5 %. Small black particles may be present in the product. They come from the kiwi seeds and don't interfere with the quality or activity of the product.

STORAGE RECOMMENDATIONS

Store the product in its original packaging sealed tightly, protected from light and moisture.

Store at a temperature of 10 °C (+/- 5).

Product should be re-analyzed after a 3-year storage period under recommended storage conditions.

HANDLING ADVICE

Presentation: liquid.

Stir well to ensure homogeneity before use.
