

1. DEFINITION

DEFINITION

Hydroglycoethanolic (Propanediol/Water/Ethanol) extract of Iris root, supplemented in Zinc and Vitamin A.

DENOMINATION

INCI NAME

(PCPC - International Nomenclature of Cosmetic Ingredients)

Propanediol
(and) Water
(and) Alcohol
(and) Iris Florentina Root Extract
(and) Zinc Sulfate
(and) Retinyl Palmitate

EUROPEAN INVENTORY OF COSMETIC INGREDIENTS - COSING

(European Commission database - [COSING](#))

Propanediol
(and) Aqua
(and) Alcohol
(and) Iris Florentina Root Extract
(and) Zinc Sulfate
(and) Retinyl Palmitate

CHINA: NMPA NOTIFIED INCI NAME

Please refer to Section 4 for more details

PROPANEDIOL
WATER
ALCOHOL
IRIS FLORENTINA ROOT EXTRACT
ZINC SULFATE
RETINYL PALMITATE

2. FIELD OF USE

FIELD OF USE

This product is a cosmetic ingredient.
It is recommended for use in cosmetic formulations.

This ingredient must be used according to appropriate regulations. Use of the ingredient outside the fields of use recommended by Gattefossé is under the responsibility of the ingredient user.

Special applications

Oral cosmetic applications

No

Pediatric cosmetic applications
(children under 3 years old)

No data available

Regulatory data sheet (RDS) - Cosmetic and personal care applications

CYTOBIOL IRIS A 2 (Code: 5829)

Last update: 09 July 2021

Use during pregnancy and lactation (breastfeeding)	No data available
Other specific applications (eye products, intimate care...)	No data available
This information is based on our current knowledge. The status for our ingredient given in this section represents Gattefossé Regulatory Affairs department personal views on the subject matters. These views have not been adopted or in any way approved legally and should not be relied upon as a statement. Please consult the document "Tox and safety overview" for additional information.	

3. COMPOSITION

COMPOSITION	
FULL LABELING (KEY LETTERS SYSTEM)	
$75.0 \leq A_1$; $50.0 \leq A_2 < 75.0$; $25.0 \leq B < 50.0$; $10.0 \leq C < 25.0$; $5.0 \leq D < 10.0$; $1.0 \leq E < 5.0$; $0.1 \leq F < 1.0$; $G < 0.1$	
Propanediol	$25.0\% \leq B < 50.0\%$
Water	$25.0\% \leq B < 50.0\%$
Alcohol	$10.0\% \leq C < 25.0\%$
Iris Florentina Root Extract	$1.0\% \leq E < 5.0\%$
Zinc Sulfate	$0.1\% \leq F < 1.0\%$
Retinyl Palmitate	$G < 0.1\%$
OTHER CONSTITUENTS (INCIDENTAL INGREDIENTS)	
None	

4. COSMETIC REGULATIONS

REGULATORY STATUS OF THE INGREDIENT FOR COSMETIC AND PERSONAL CARE APPLICATIONS (Non-exhaustive list of countries, please contact us for additional information)	
EUROPEAN UNION (European Cosmetic Regulation 1223/2009 and its amendments)	Approved
U.S.A. (FD&C Act— 21 CFR 700 to 740)	Approved
CANADA (Food and Drugs Act and Cosmetic Regulations)	Approved
MERCOSUR: Argentina, Brazil, Paraguay and Uruguay; with association agreements with Chile and Bolivia (Regulation for Personal Hygiene Products, Cosmetics & Perfumes)	Approved
AUSTRALIA (Notification & Assessment Act 1989, as amended—TGA)	Approved
NEW ZEALAND (Cosmetic Products Group Standard)	Approved
JAPAN (Pharmaceutical Affairs Law - regulations for cosmetics)	Approved
SOUTH KOREA (Cosmetics Law - Korea Food & Drug Administration KFDA)	Approved

AUSTRALIA - USE IN THERAPEUTIC GOODS

Status	TGA name	TGA reference number	Use	Restrictions
			Over the Counter, Prescription Medicines. Not available as a Homoeopathic Ingredient in Listed Medicines. Available for use as an Excipient Ingredient in: Biologicals, Devices, Export Only, Listed Medicines, Over the Counter, Prescription Medicines. Not available as an Equivalent Ingredient in any application.	When for use in topical medicines, the concentration of Vitamin A in the medicine must be no more than 1%. When for internal use, the maximum daily dose must be no more than 3000 micrograms of Retinol Equivalents. When preparations for internal use in adults contain more than 33 micrograms of retinol equivalents per dosage unit in divided preparations or per gram of an undivided preparation, the medicine requires the following warning statements on the medicine label: - (VITA2) 'WARNING: If you are pregnant - or considering becoming pregnant - do not take Vitamin A supplements without consulting your doctor or pharmacist [or words to that effect].' NOTE: Position this warning at the beginning of the directions for use. - (VITA4) 'WARNING - When taken in excess of 3000 micrograms retinol equivalents - Vitamin A can cause birth defects.' NOTE: Position this warning at the beginning of the directions for use. - (VITA3) 'The recommended daily amount of Vitamin A from all sources is 700 micrograms retinol equivalents for women and 900 micrograms retinol equivalents for men.'

Australia has a two-tiered system for the regulation of medicines, including complementary medicines:

Registered Medicines: higher risk medicines must be registered on the Australian Register of Therapeutic Goods (ARTG), which involves individually evaluating the quality, safety and effectiveness of the product.

Listed Medicines: lower risk medicines containing pre-approved, low-risk ingredients. Ingredients must be evaluated and included in the Therapeutic Goods (Permissible Ingredients) Determination before they can be used listed medicines.

The Australian Register of Therapeutic Goods (ARTG) is available at: <https://www.ebs.tga.gov.au/>

JAPAN - USE IN QUASI DRUGS

CANADA - USE IN NATURAL HEALTH PRODUCTS

Status	NHPID name	Route of administration/ Restrictions
Approved non-medicinal ingredient	Trimethylene Glycol Water Ethanol Iris florentina Root Extract Zinc sulfate Vitamin A palmitate	Topical use. The presence of Vitamin A palmitate as restricted on the List of Prohibited and Restricted Cosmetic Ingredients (the Cosmetic Ingredient Hotlist) indicates that there are potential safety issues. This ingredient must be used in accordance with the restrictions set out on the Hotlist when included in topical natural health products, unless additional evidence for safety is submitted.

Under the Natural Health Products Regulations, which came into effect on January 1, 2004, natural health products (NHPs) are defined as: Probiotics; Herbal remedies; Vitamins and minerals; Homeopathic medicines; Traditional medicines such as traditional Chinese medicines; Other products like amino acids and essential fatty acids.

The Natural Health Products Ingredients Database (NHPID) lists acceptable medicinal and non-medicinal ingredients used in Natural Health Products. It is available at: <http://webprod.hc-sc.gc.ca/nhp-id-bdipsn/search-rechercheReq.do>

6. NATURAL & ORGANIC COSMETICS

CALCULATIONS ACCORDING TO ISO 16128 STANDARD

Guidelines on Technical Definitions and Criteria for Natural & Organic Cosmetic Ingredients

- Natural content (CN): $25\% < CN \leq 50\%$
- Natural origin content (Cno): $75\% < Cno \leq 100\%$
 - Organic content (CO): 0%
 - Organic origin content (COO): 0%

This has been determined based on the origin of the raw materials (including intentionally added additives, if any) and our manufacturing processes.

This is based on our current knowledge and understanding of the available texts (ISO 16128-1 and ISO 16128-2).

7. CHEMICAL REGULATIONS

CHEMICAL REGULATION

INCI Name	CAS #	EINECS #	Chemical name
Propanediol	504-63-2 (or 26264-14-2)	207-997-3 (or None)	1,3-dihydroxypropane (or Propanediol)

U.S.A.: Substances that are regulated under other federal regulations, including food additives, drug, cosmetics... are not subject to TSCA regulation.
"Naturally occurring substances" are not subject to Premanufacture Notice reporting.

Canada: Substances not listed on DSL or NDSL can be imported in Canada in quantities not exceeding 100 kg per 12-month period and per importer. Substances listed on NDSL only can be imported in Canada in quantities not exceeding 1000 kg per 12-month period and per importer. Please contact us if you go beyond these volumes. In addition, substances not listed in DSL or NDSL, but listed in the "in-commerce list" can be freely used in Products Regulated Under the Food and Drugs Act (F&DA). In addition, substances considered as "Natural" according to Health Canada's definition are exempted from New Substances regulation.

Australia: The Australian Inventory of Chemical Substances (AICS) has been replaced by the Australian Inventory of Industrial Chemicals (AIIC) since July 2020. Chemicals listed on the AIIC are available for industrial use in Australia; however, importers must register with Australian authorities before importing the chemical in Australia. Some chemicals require specific information to be provided to Australian authorities.

Naturally occurring chemicals are exempted from AIIC listing.

Chemicals not listed on the AIIC must be assessed before importation.
