

1. DEFINITION

DEFINITION

Glycoethanolic (Butylene glycol/Ethanol) extract of Sophora Flavescens root, added with a natural water of kiwi

DENOMINATION

INCI NAME

(PCPC - International Nomenclature of Cosmetic Ingredients)

Butylene Glycol
(and) Actinidia Chinensis (Kiwi) Fruit Water
(and) Alcohol
(and) Sophora Flavescens Root Extract

EUROPEAN INVENTORY OF COSMETIC INGREDIENTS – COSING

(European Commission database - [COSING](#))

Butylene Glycol
(and) Actinidia Chinensis (Kiwi) Fruit Water
(and) Alcohol
(and) Sophora Flavescens Root Extract

ADDITIONAL INFORMATION ON THE DENOMINATION

Genus Species Name: Actinidia Chinensis
Common Name(s): Kiwi
Genus Species Name: Sophora flavescens
Common Name(s): Sophora Angustifolia,
Shrubby Sophora, shrubby sophora, ku shen

2. FIELD OF USE

FIELD OF USE

This product is a cosmetic ingredient.
It is recommended for use in cosmetic formulations.

This ingredient must be used according to appropriate regulations. Use of the ingredient outside the fields of use recommended by Gattefossé is under the responsibility of the ingredient user.

Special applications

Oral cosmetic applications

No

Pediatric cosmetic applications
(children under 3 years old)

No data available

Use during pregnancy and lactation (breastfeeding)

No data available

Other specific applications (eye products, intimate care...)

No data available

This information is based on our current knowledge. The status for our ingredient given in this section represents Gattefossé Regulatory Affairs department personal views on the subject matters. These views have not been adopted or in any way approved legally and should not be relied upon as a statement.

Please consult the document "Tox and safety overview" for additional information.

Regulatory data sheet (RDS) - Cosmetic and personal care applications

3. MANUFACTURING PROCESS AND COMPOSITION

MANUFACTURING PROCESS	
Mixture of 2 extracts in Butylene glycol: Kiwi extract obtained by flash distillation and alcoholic extract of Sophora roots	
COMPOSITION	
FULL LABELING (KEY LETTERS SYSTEM)	
$75.0 \leq A_1$; $50.0 \leq A_2 < 75.0$; $25.0 \leq B < 50.0$; $10.0 \leq C < 25.0$; $5.0 \leq D < 10.0$; $1.0 \leq E < 5.0$; $0.1 \leq F < 1.0$; $G < 0.1$	
Butylene Glycol	$50.0\% \leq A_2 < 75.0\%$
Actinidia Chinensis (Kiwi) Fruit Water	$25.0\% \leq B < 50.0\%$
Alcohol	$5.0\% \leq D < 10.0\%$
Sophora Flavescens Root Extract	$1.0\% \leq E < 5.0\%$
MEDIAN VALUES	
Median values are determined by taking the average of each key letter and adapting each result so that the total equals 100%.	
Butylene Glycol	55.0%
Actinidia Chinensis (Kiwi) Fruit Water	34.7%
Alcohol	7.0%
Sophora Flavescens Root Extract	3.0%
Ascorbic acid 0.3%	
OTHER CONSTITUENTS (INCIDENTAL INGREDIENTS)	
Antioxidant agent (max added value) :	
Ascorbic acid 0.3%	
Maximum added content.	

4. COSMETIC REGULATIONS

REGULATORY STATUS OF THE INGREDIENT FOR COSMETIC AND PERSONAL CARE APPLICATIONS (Non-exhaustive list of countries, please contact us for additional information)	
EUROPEAN UNION (European Cosmetic Regulation 1223/2009 and its amendments)	Approved
U.S.A. (FD&C Act— 21 CFR 700 to 740)	Approved
CANADA (Food and Drugs Act and Cosmetic Regulations)	Approved
MERCOSUR: Argentina, Brazil, Paraguay and Uruguay; with association agreements with Chile and Bolivia (Regulation for Personal Hygiene Products, Cosmetics & Perfumes)	Approved
AUSTRALIA (Poisons Standard – SUSMP)	Approved (Some requirements may apply, please contact us for additional information)

Regulatory data sheet (RDS) - Cosmetic and personal care applications

5. BORDER-LINE REGULATIONS

AUSTRALIA - USE IN THERAPEUTIC GOODS

Status	TGA name	TGA reference number	Use	Restrictions
Approved	1,3-Butylene glycol	52483	Available for use as an Active Ingredient in: Biologicals, Prescription Medicines Available for use as an Excipient Ingredient in: Biologicals, Devices, Export Only, Listed Medicines, Over the Counter, Prescription Medicines	/
Approved	Actinidia chinensis	82373	Available for use as an Active Ingredient in: Export Only, Listed Medicines, Over the Counter, Prescription Medicines Available for use as a Homoeopathic Ingredient in Listed Medicines Available for use as an Excipient Ingredient in: Prescription Medicines	/
Approved	Ethanol	53462	Available for use as an Active Ingredient in: Biologicals, Export Only, Listed Medicines, Over the Counter, Prescription Medicines Available for use as an Excipient Ingredient in: Biologicals, Devices, Export Only, Listed Medicines, Over the Counter, Prescription Medicines Available for use as an Equivalent Ingredient in: Listed Medicines	Restriction applies to listed medicines: When used as an active ingredient, can only be supplied as an un compounded medicine substance packed for retail sale and must comply with an un compounded substance monograph of the British Pharmacopoeia, as in force or existing from time to time. When the concentration of ethanol from all ingredients in the medicine is more than 3%, the medicine requires the following warning statement on the medicine label: - (ETHAN) 'Contains ethanol or contains alcohol'.
Approved	Sophora flavescens	108240	Available for use as an Active Ingredient in: Export Only, Listed Medicines, Over the Counter, Prescription Medicines Available for use as a Homoeopathic Ingredient in Listed Medicines Available for use as an Excipient Ingredient in: Listed Medicines, Prescription Medicines	/
Approved	Ascorbic acid	52224	Available for use as an Active Ingredient in: Biologicals, Export Only, Listed Medicines, Over the Counter, Prescription Medicines Not available as a Homoeopathic Ingredient in Listed Medicines Available for use as an Excipient Ingredient in: Biologicals, Devices, Export Only, Listed Medicines, Over the Counter, Prescription Medicines Available for use as an Equivalent Ingredient in: Export Only, Listed Medicines, Prescription Medicines	/

Australia has a two-tiered system for the regulation of medicines, including complementary medicines:

Registered Medicines: higher risk medicines must be registered on the Australian Register of Therapeutic Goods (ARTG), which involves individually evaluating the quality, safety and effectiveness of the product.

Listed Medicines: lower risk medicines containing pre-approved, low-risk ingredients. Ingredients must be evaluated and included in the Therapeutic Goods (Permissible Ingredients) Determination before they can be used listed medicines.

The Australian Register of Therapeutic Goods (ARTG) is available at: <https://www.ebs.tga.gov.au/>

JAPAN - USE IN QUASI DRUGS

Status	Adopted Japanese name	MHW code	Limitations
Listed	1, 3 Butylene glycol	100040	No limit
	Kiwi extract	520328	Cat 8, 9, 10: not used
	Ethanol	001076	No limit
	Sophora Root extract	522032 (or 522033)	Cat 8,9,10 Not used
	Ascorbic acid	001008	Cat 8: not used

The Quasi-Drugs status is given for information only; it is based on the presence of the ingredient name in the List of Additives for Quasi-Drugs. It does not mean that the ingredient conforms with Quasi-Drugs requirements.

CANADA - USE IN NATURAL HEALTH PRODUCTS

Status	NHPID name	Route of administration/ Restrictions
Approved Chemical Name	1,3-Butylene glycol	<u>Toxicity Restriction:</u> Upper Limit: 4.0 Milligrams/kilogram body weight/day Detail: Acceptable daily intake up to 4 mg/kg bw/day. <u>Role Non-medicinal:</u> Purposes: Flavour Enhancer , Fragrance Ingredient , Humectant , Skin-Conditioning Agent , Solvent , Viscosity Decreasing Agent Route Of Administration: Topical Allowed Purposes: Fragrance Ingredient , Skin-Conditioning Agent , Solvent , Viscosity Decreasing Agent, Humectant Route Of Administration: Oral Allowed Purposes: Flavour Enhancer, solvent <u>Role Non-NHP:</u> Rationale: A non-NHP because not a naturally occurring substance included in Schedule 1 of the Natural Health Products Regulations.
Approved Herbal Substance Name	Actinidia Chinensis (Kiwi) Fruit Water	<u>Role Non-medicinal:</u> Purposes: Fragrance Ingredient Route Of Administration: Topical Allowed Purposes: Fragrance Ingredient
Approved Chemical Name	Ethanol	<u>Role Medicinal:</u> Rationale: Classified as an NHP under Schedule 1, item 2 (an isolate) of the Natural Health Products Regulations <u>Role Non-medicinal:</u> Purposes: Antifoaming Agent , Cosmetic Astringent , Flavour Enhancer , Fragrance Ingredient , Preservative Antimicrobial , Solubilizing Agent , Solvent , Viscosity Decreasing Agent

CANADA - USE IN NATURAL HEALTH PRODUCTS

Status	NHPID name	Route of administration/ Restrictions
		Route Of Administration: Oral Detail: For use by children under 12 years of age, the quantity of ethanol provided by the product, according to the recommended dose, should not yield a blood ethanol concentration in excess of 0.125 g/L, for any single dose. The restrictions on the use of ethanol in children presented in EMA/HMPC/85114/2008 should be used, unless sufficient evidence is provided that supports the product's safe use, according to the recommended conditions of use.
Approved Herbal Substance Name	Sophora Angustifolia Root Extract	<u>Role Non-medicinal:</u> Purposes: Skin-Conditioning Agent Route Of Administration: Topical
Approved Chemical Name	Ascorbic acid	/
Under the Natural Health Products Regulations, which came into effect on January 1, 2004, natural health products (NHPs) are defined as: Probiotics; Herbal remedies; Vitamins and minerals; Homeopathic medicines; Traditional medicines such as traditional Chinese medicines; Other products like amino acids and essential fatty acids. The Natural Health Products Ingredients Database (NHPID) lists acceptable medicinal and non-medicinal ingredients used in Natural Health Products. It is available at: http://webprod.hc-sc.gc.ca/nhp-id-bdipsn/search-rechercheReq.do		

6. NATURAL & ORGANIC COSMETICS

STATUS OF THE INGREDIENT FOR ORGANIC/NATURAL COSMETIC FORMULATIONS

Body	Standard	Status	Evaluation conclusions
ECOCERT			
Ecocert Greenlife	Ecocert Standard for Natural and Organic Cosmetics	Approved raw material	Nat: 100% Veg: 41.4% Synth: 0%
COSMOS			
Ecocert Greenlife	COSMOS-standard	Approved raw material	PPAI: 41,4 % CPAI: 58,6 % NNI: 0% PeMo: 0 %
NSF / ANSI 305			
Quality Assurance International	NSF / ANSI 305 standard	Approved	Acceptable ingredient for use in an organic personal care product under NSF/ANSI 305-2016
ECOCERT: The following product has been evaluated by ECOCERT® Greenlife and complies with the ECOCERT standard for ingredients to be used in Ecological and Organic cosmetics. We would like to draw your attention to the fact that this product is not "Organic certified".			
ECOCERT Definitions: Nat: Natural or from natural origin; Veg: Physically processed vegetal ingredients; Synth: Synthetic (petrochemical).			
COSMOS: The following product has been evaluated by ECOCERT® Greenlife and complies with the COSMOS standard for ingredients to be used in COSMOS-Natural and COSMOS-Organic cosmetics. We would like to draw your attention to the fact that this product is not "Organic certified".			
COSMOS Definitions: PPAI = Physically Processed Agro-Ingredient; CPAI = Chemically Processed Agro-Ingredient; PeMo = Petrochemical Moieties; NNI: Non Natural Ingredients.

CALCULATIONS ACCORDING TO ISO 16128 STANDARD

Guidelines on Technical Definitions and Criteria for Natural & Organic Cosmetic Ingredients

- Natural content (CN): $25\% < CN \leq 50\%$
- Natural origin content (Cno): 100%
 - Organic content (CO): 0%
 - Organic origin content (COO): 0%

This has been determined based on the origin of the raw materials (including intentionally added additives, if any) and our manufacturing processes.

This is based on our current knowledge and understanding of the available texts (ISO 16128-1 and ISO 16128-2).

7. CHEMICAL REGULATIONS

CHEMICAL REGULATION

INCI Name	CAS #	EINECS #	Chemical name

Last update: 04 August 2022

NATIONAL INVENTORIES

INCI name	U.S.A. (TSCA)	Canada (DSL/NDSL)	Australia (AIIC)	China (IECSC)	Inventory names
U.S.A.: Substances used in the following product categories are excluded from TSCA authority: foods, food additives, drugs, cosmetics.					
Canada: Substances not listed on DSL or NDSL can be imported in Canada in quantities not exceeding 100 kg per 12-month period and per importer. Substances listed on NDSL only can be imported in Canada in quantities not exceeding 1000 kg per 12-month period and per importer. Please contact us if you go beyond these volumes. In addition, substances not listed in DSL or NDSL, but listed in the "in-commerce list" can be freely used in Products Regulated Under the Food and Drugs Act (F&DA). In addition, substances considered as "Natural" according to Health Canada's definition are exempted from New Substances regulation.					
Australia: The Australian Inventory of Chemical Substances (AICS) has been replaced by the Australian Inventory of Industrial Chemicals (AIIC) since July 2020. Chemicals listed on the AIIC are available for industrial use in Australia; however, importers must register with Australian authorities before importing the chemical in Australia . Some chemicals require specific information to be provided to Australian authorities. Naturally occurring chemicals are exempted from AIIC listing. Chemicals not listed on the AIIC must be assessed before importation.					
*China: if your company intends to import our ingredient as chemical entities in China, please consult us.
