

Emulium® Kappa MB

Natural sensuality

People make our name

Voluptuous wax butter

Based on the synergistic association of three functionalized plant waxes, Emulium® Kappa MB is an emulsifier inspired by nature with remarkable sensory advantages.

Truly active, Emulium® Kappa MB brings to formulations natural moisturizing properties.

The cushion textures thus obtained are unique, infinitely soft and sensually voluptuous.

Emulium® Kappa MB is a multi-component ingredient which guarantees sensorial texture, emulsification performance and perfect stability.

1 A unique patented complex of hydrophilized **vegetable waxes**

Rice bran wax
Hardness & powdery touch

+

Candelilla wax
Richness & water retention

+

Jojoba wax
Softness & easy spreading

Functionalized with Polyglycerol-3

Unique wax butter

- Powdery feel
- Rich texture
- Cushion effect on the skin

This soft butter has the ability to absorb up to 6 times its weight in water, forming a true water cushion on the skin.

2 **Sodium Stearoyl Lactylate (SSL)**, an anionic emulsifier based on lactic acid, essential for good emulsification, offering excellent tolerance profile and acting as skin hydration agent

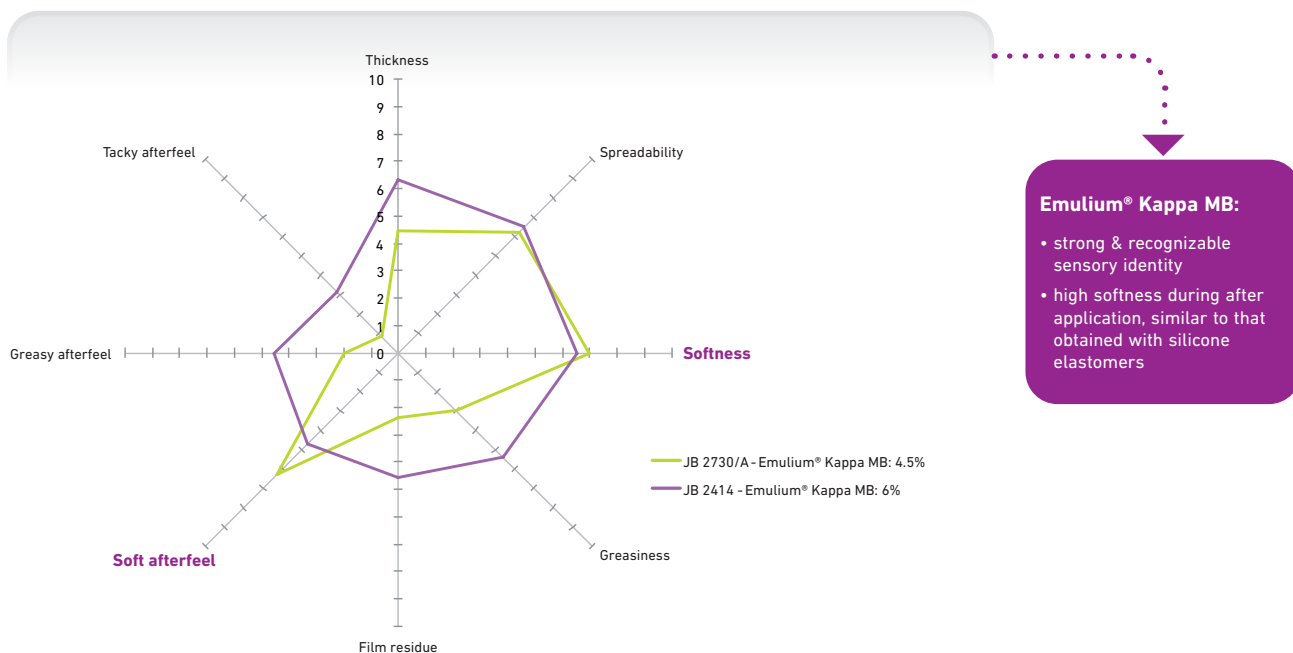

3 A combination of **consistency agents** that help stabilize the viscosity of formulations at high temperatures

A PEG-free emulsifier inspired by the plant world, Emulium® Kappa MB gives formulations an ultra-soft texture and cushion touch, for a truly distinctive sensory identity.

Active & sensual textures

High softness during and after application

Emulium® Kappa MB offers cosmetic formulations with a unique texture, very similar to that obtained using silicone elastomers, without the disadvantage of their dry touch. Its capacity to structure the aqueous phase is key to the sensory profile of formulations.

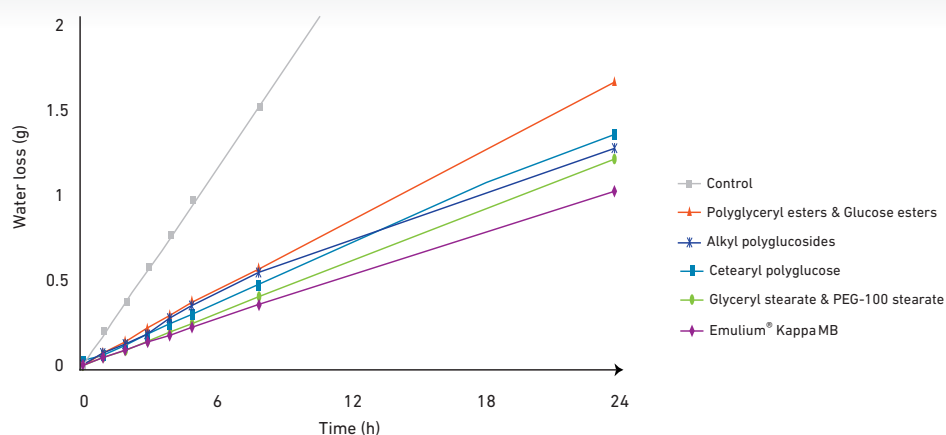

Through the formation of a palpable cushion, the skin is plumped, smoothed and feels extremely soft even after absorption. The emulsions are easy to apply and present a long lasting playtime and comfort.

Moisturizing effect ⁽¹⁾

Emulium® Kappa MB allows the formulation of active moisturizing textures, by means of a dual effect:

- the SSL contribution towards the Natural Moisturizing Factor (NMF),
- the protection of the skin water content brought by the wax derivative due to its film-forming effect.

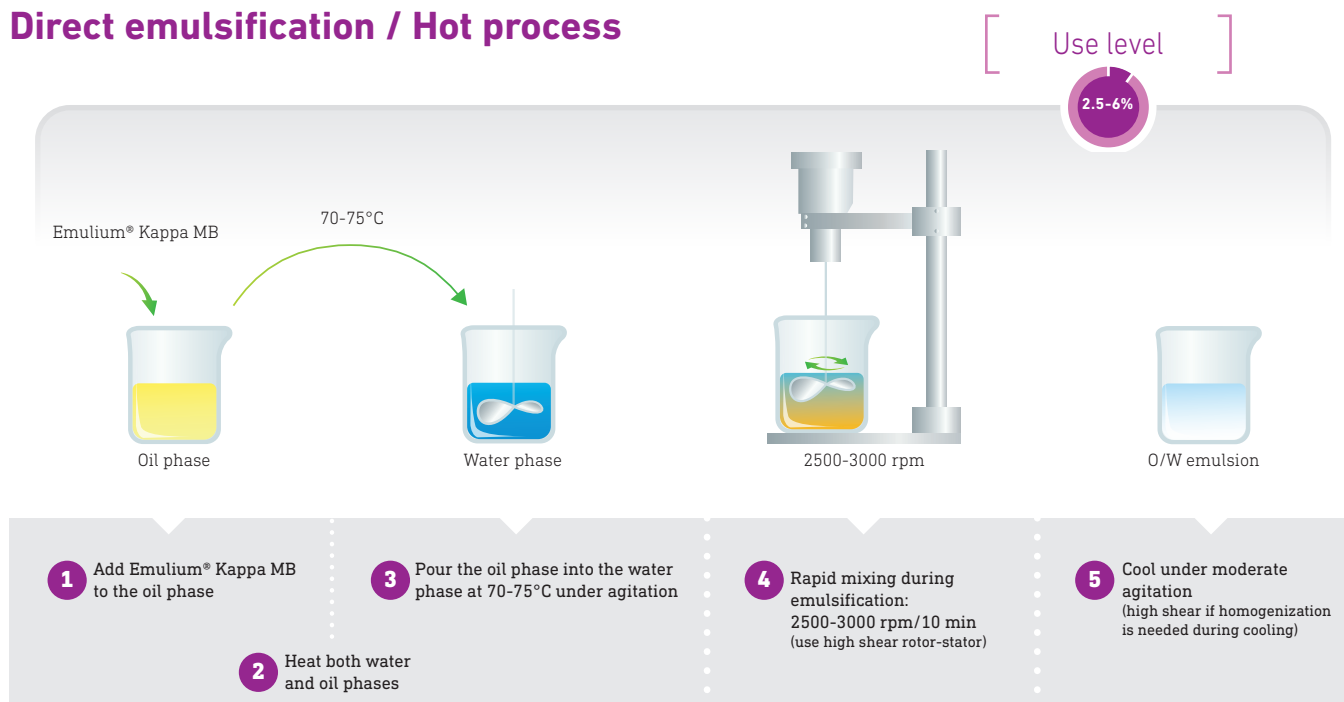

By limiting dehydration, Emulium® Kappa MB leaves the skin fresh and moisturized all day long.

⁽¹⁾ Water evaporation test (*in vitro*). The emulsion is spread over the medium then left to rest for 16 hours to allow evaporation of the water contained in the emulsion itself. The system is then maintained for 24 hours at 32°C under a laminar flow and water loss is measured over this period of time.

Formulation tips

Direct emulsification / Hot process

Gelling agents

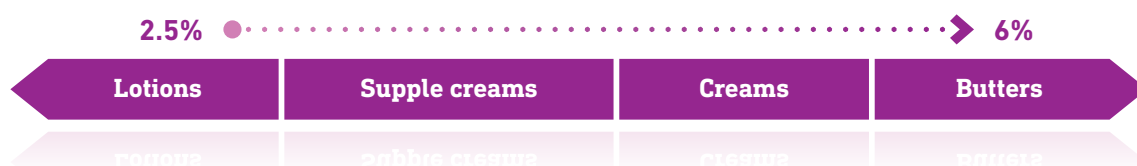

- Natural gelling agents are required (microcrystalline cellulose works well with Emulium® Kappa MB)
- Avoid carbomers and other synthetic gelling agents
- Xanthan gum, used alone, is insufficient to ensure resistance to temperatures over 40°C

Compatibilities

Oils	All types of oil up to 25%
Consistency agents	Behenyl Alcohol, Cetyl Alcohol or Cetearyl Alcohol
Actives	Compatible with most actives at a pH between 5-8
UV filters	Organic and mineral UV filters, except hydrophilic UV filters
Alcohol	Up to 5%
Electrolytes	Sensitive to electrolytes (up to 0.5% NaCl)

Textures

Emulium® Kappa MB

answers formulators' need for a multi-functional PEG-free natural emulsifier that creates truly active textures with distinctive sensorial identity.

- Perfect for the creation of natural cosmetic lines
- Patented composition based on an innovative wax butter
- Offering natural moisturizing properties

Characteristics

- PEG-free
- Derived from vegetable waxes
- Active textures (moisturizing)
- Cushion feel

Applications

- From lotions to thick butters
- Skin care
- Organically certified and vegan formulations

Sensoriality

- Very glossy, rich and luxury textures
- Long playtime
- High softness

Use level

2.5 to 6%

Use pH

5-8

INCI name: Candelilla/Jojoba/Rice Bran Polyglycerol-3 Esters (and) Glyceryl Stearate (and) Cetearyl Alcohol (and) Sodium Stearoyl Lactylate

Worldwide approval for cosmetic applications

Listed on IECIC (Inventory of Existing Cosmetic Ingredients in China) 2015

COSMOS approved ⁽²⁾

⁽²⁾ This product has been approved by Ecocert Greenlife for use in cosmetics products certified to the COSMOS-standard for Natural and Organic Cosmetics.
