

Fresh Cells™

Plant microcapsules

People make our name

From cells to skin

Fresh Cells™ are suspensions of whole, fresh fruit cells, obtained by a specific enzymatic process.

When they come in contact with the skin, they release their precious content, bringing all the benefits of the original plant to the skin.

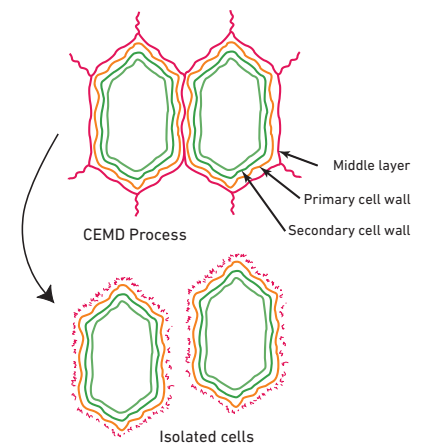

Strawberry, Carrot, Pumpkin, Mango and Kiwi make up this range of natural delicacies.

An innovative process

A gentle enzymatic process – Controlled Enzymatic Micro-Dissociation (CEMD) – allows to separate the cells from each other, without altering their structure or shape.

Each cell is surrounded by various membranes called cell walls. Using this mild dissociation technique, only the middle layer is digested; the other walls remain protected and intact.

The result of this exclusive technology is the suspension of intact cells, easily incorporated into all types of cosmetic formulations.

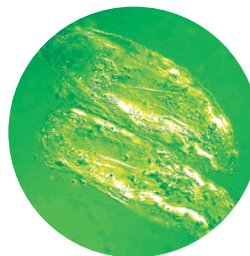

Carrot

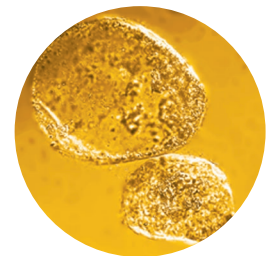

- Square shape
- Small size (20 µm)

Kiwi

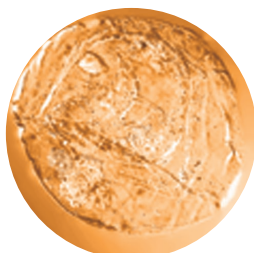

- Long stick shape
- Medium-sized (80 µm)

Mango

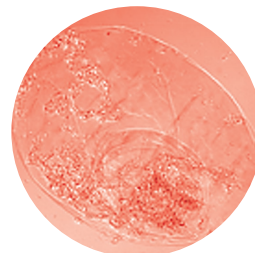

- Fine round shape
- Medium-sized (80 µm)

Pumpkin

- Round shape
- Medium-sized (80 µm)

Strawberry

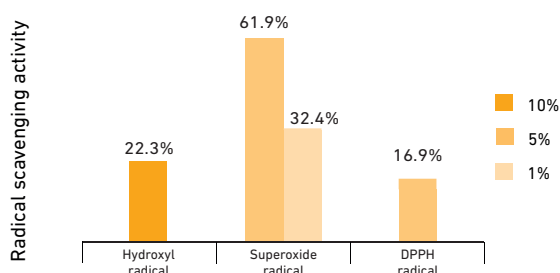

- Oval shape
- Large in size (300 µm)

A basket of natural properties

Carrot

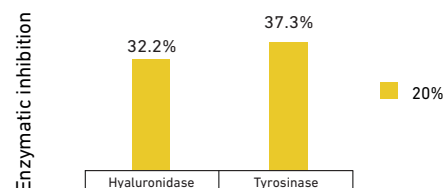

- ▶ Antioxidant effect
- ▶ Reinforces the resistance of skin cells against stress

The major asset of **Fresh Cells™ Carrot** lies in the presence of β -carotene, a beauty vitamin for the skin and powerful free radical quencher. Fresh Cells™ Carrot can be added to all types of formulation, for a healthy complexion effect or to help fight everyday stress.

Mango

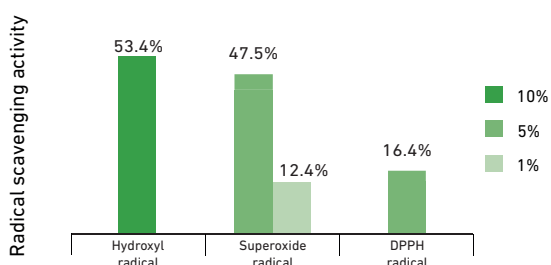

- ▶ Inhibition of the activity of hyaluronidase
- ▶ Anti-tyrosinase effect

Rich in β -carotene and mineral salts, **Fresh Cells™ Mango** enhance skin tone and nourish the skin.

Kiwi

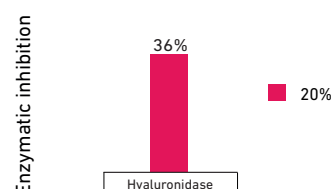

- ▶ Anti-oxidant effect
- ▶ Prevents oxidative stress

Fresh Cells™ Kiwi are particularly rich in antioxidants.

Strawberry

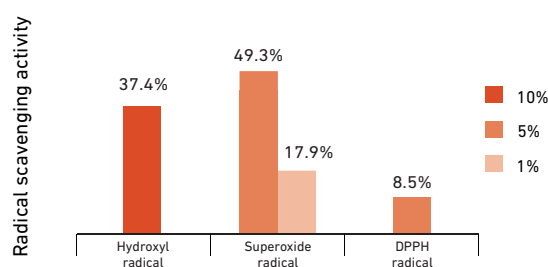

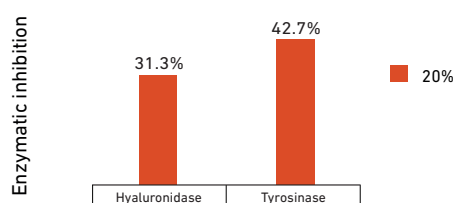

- ▶ Anti-hyaluronidase activity
- ▶ Protection of the moisturizing capital of the skin

Fresh Cells™ Strawberry are perfect to tone up and purify the skin while providing freshness and well-being.

Pumpkin

- ▶ Inhibition of hyaluronidase and tyrosinase activities
- ▶ Protective effect against free radicals

Rich in β -carotene and mineral salts, **Fresh Cells™ Pumpkin** have protective, lightening and moisturizing benefits.

A piece of fruit in formulation

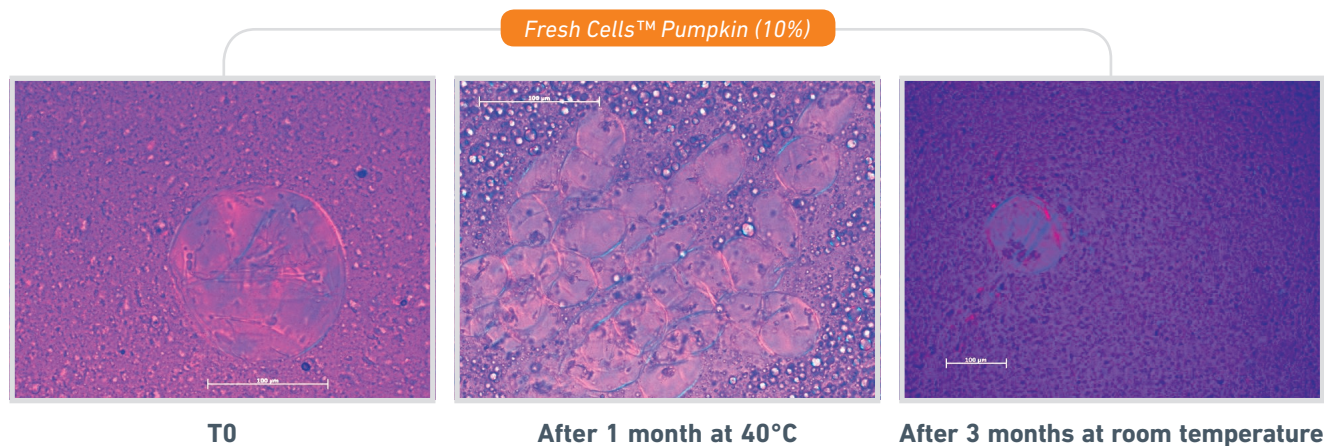

Easy to formulate

- Disperse in the water phase
- Add at the end of the formulation process at approximately 45°C or below
- Stirring: 2500 rpm max

Perfect stability in emulsions

Easy to incorporate into all kinds of cosmetic products, Fresh Cells™ remain intact and visible, even in complex formulas.

Visible under standard microscope, Fresh Cells™ are stable in emulsions.

Fresh Cells™

are suspensions of whole, intact fresh fruit cells resulting from a mild and selective process.

Due to their rich content in nutritive elements, they act as natural vectors of activity and bring to the skin all the benefits of the original plant.

When Fresh Cells™ come in contact with the skin, they degrade due to enzymes in the epidermis and physical application, and sparingly pour out their precious content – protected until that point in a sort of natural microcapsule.

As cell walls are protected during extraction, these microcapsules remain intact and visible, even in complex formulations.

Characteristics

- Provide the skin with essential nutrients
- Moisturizing, skin lightening benefits
- Boost tired skin, refresh or improve skin protection
- Naturally-derived
- Solvent and colorant free

Use level

5% (for a good cell density)

INCI:

Water (and) Daucus Carota Sativa (Carrot) Root Extract

Water (and) Fragaria Vesca (Strawberry) Fruit Extract

Water (and) Mangifera Indica (Mango) Fruit Extract

Water (and) Actinidia Chinensis (Kiwi) Fruit Extract

Water (and) Cucurbita Pepo (Pumpkin) Fruit Extract

Preservatives: Sorbic Acid, Phenoxyethanol, Ethylhexylglycerin

Worldwide approval for cosmetic applications

Listed on IECIC (Inventory of Existing Cosmetic Ingredients in China) 2015
