CHERRY BIO

Rethink Water

100% Fruit waters
100% Organic

ORIGINAL EXTRACT C&C-GB-B02-W (2073CC)

Organic Cherry and Organic Cranberry join the range of ORIGINAL EXTRACTS (LES EXTRAITS ORIGINELS®), pure and authentic plant waters. These ORIGINAL EXTRACTS come from the dehydration of organic sour cherries and organic cranberries at low temperature.

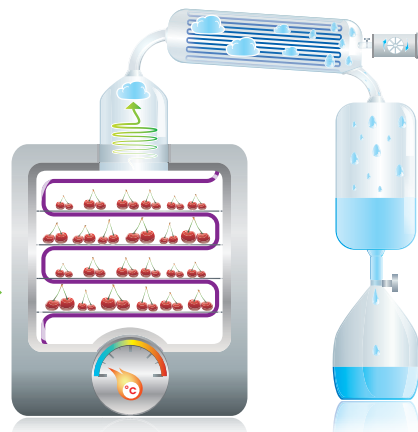

Harvested in their original, natural habitat, these living waters are of the highest quality.

- Rich and pure as the fruit itself
- Preservative-free
- May partially or completely replace the water content of a cosmetic formulation.

Evaporation technology

Gentle dehydration of the fruit, an eco-friendly process, is used to ensure that no damage is made to trace elements and mineral salts contained within the plant water.

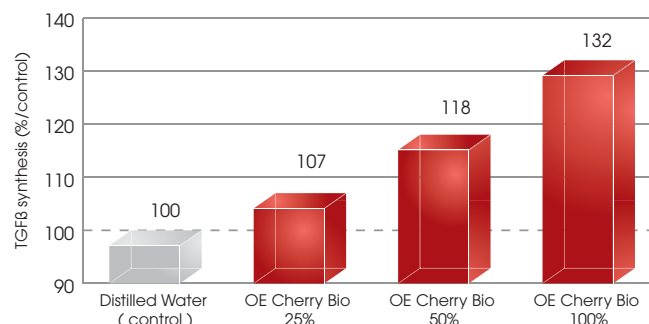

Applications & Formulations

ORIGINAL EXTRACTS CHERRY & CRANBERRY BIO can be successfully formulated in all cosmetic products.

As traditional water (tap, distilled or mineral) has been removed from the organic calculation in COSMOS standard, **ORIGINAL EXTRACTS CHERRY & CRANBERRY BIO** represent an easy way to increase the global percentage of overall organic material

Involved in fibroblast production of collagen, Transforming Growth Factor (TGFβ) is known as a key growth factor controlling extra cellular matrix remodeling.

ORIGINAL EXTRACT CHERRY BIO stimulates TGFβ synthesis of human fibroblasts by up to 32% with a clear dose-effect.

ORIGINAL EXTRACT CHERRY BIO will target wrinkle smoothing and revitalize the skin. It will boost the activity of anti-aging, energizing and firming lines.

► A major north American crop, cranberries are considered as «superfruit» due to their nourishing and antioxidant power

► From late June, bees pollinate the cranberry flowers and tiny fruits begin to form

► By September, they start developing their characteristic red color through the production of anthocyanin pigments

► The fruit are harvested in autumn when they reach their peak of color and flavor

► Cranberries are detached from their shrubs and float away to be gathered by growers

► Cranberry contains more than 87% of water and a large amount of powerful antioxidants such as flavonoids
