

1. DEFINITION

DEFINITION
Triglycerides medium-chain EP / Medium-chain triglycerides NF / Medium chain fatty acid triglyceride JPE

DENOMINATION

INCI NAME* (PCPC - International Nomenclature of Cosmetic Ingredients)	Caprylic/Capric Triglyceride
UNII (Unique Ingredient Identifier) USP/FDA Substance Registration System (SRS)	C9H2L21V7U

*INCI name is given for information only. This ingredient is a pharmaceutical excipient. It must be used according to applicable regulations. Gattefossé accepts no responsibility for the use of this product in applications other than those recommended.

2. FIELD OF USE

FIELD OF USE
This ingredient must be used according to appropriate regulations
Pharmaceutical ingredient (Parenteral, oral, topical and/or rectal/vaginal routes)

3. MANUFACTURING PROCESS AND COMPOSITION

MANUFACTURING PROCESS
Bulk TCM are obtained by an esterification reaction between Glycerol and Caprylic/Capric acids (C8 -C10). Gattefossé SAS purchases bulk TCM, makes filtration, packaging, control and batch release.

COMPOSITION	
Triglycerides of Caprylic/Capric acids (C8 - C10)	
Full Labeling (Key letters system)	
A ₁ ≥ 75.0 ; 50.0 ≤ A ₂ < 75.0 ; 25.0 ≤ B < 50.0 ; 10.0 ≤ C < 25.0 ; 5.0 ≤ D < 10.0 ; 1.0 ≤ E < 5.0 ; 0.1 ≤ F < 1.0 ; G < 0.1	
Caprylic/Capric Triglyceride	A ₁ ≥ 75.0%
Other constituents (i.e. incidental ingredients)	
None

5. DRUG MASTER FILE

A Drug Master File (DMF) is a submission to the Food and Drug Administration (FDA) that may be used to provide confidential detailed information about facilities, processes, or articles used in the manufacturing, processing, packaging, and storing of one or more human drugs. The submission of a DMF is not required by law or FDA regulation. A DMF is submitted solely at the discretion of the holder. (Source: US FDA)

In general, the excipient DMF is not used for compendial excipients but more for novel excipients (e.g., new excipients, mixtures, coprocessed materials, and biotech excipients).

FDA usually does not review DMFs for compendial excipients unless there is a specific reason to do so (e.g., new route of administration or application for existing excipients).

(Source: IPEC Americas)

We have no DMF for LABRAFAC LIPOPHILE WL 1349 because it is a compendial excipient.

EC numbers: There are three separate inventories. These are the European Inventory of Existing Commercial Chemical Substances (EINECS), the European List of Notified Chemical Substances (ELINCS) and the No-Longer Polymers (NLP) list. EINECS numbers start with 2 or 3. ELINCS numbers start with 4. NLP numbers start with 5. Substances without EC numbers were assigned "list numbers" in order to facilitate REACH submissions. They are solely of administrative, and not of regulatory relevance. The list numbers start with 6, 7, 8 or 9.

U.S.A.: Substances that are regulated under other federal regulations, including food additives, drug, cosmetics... are not subject to TSCA regulation. "Naturally occurring substances" are not subject to Premanufacture Notice reporting. Canada: Substances not listed on DSL or NDSL can be imported in Canada in quantities not exceeding 100 kg per 12-month period and per importer. Substances listed on NDSL only can be imported in Canada in quantities not exceeding 1000 kg per 12-month period and per importer. Please contact us if you go beyond these volumes. In addition, substances not listed in DSL or NDSL, but listed in the "in-commerce list" can be freely used in Products Regulated Under the Food and Drugs Act (F&DA). In addition, substances considered as "Natural" according Health Canada's definition are exempted from New Substances regulation. Australia: The Australian Inventory of Chemical Substances (AICS) has been replaced by the Australian Inventory of Industrial Chemicals (AIIC) since July 2020. Chemicals listed on the AIIC are available for industrial use in Australia; however, importers must register with Australian authorities before importing the chemical in Australia. Some chemicals require specific information to be provided to Australian authorities. Naturally occurring chemicals are exempted from AIIC listing; importers may have to submit a declaration. Chemicals not listed on the AIIC must be assessed before importation.					

REACH REGULATION (REGISTRATION, EVALUATION, AUTHORISATION AND RESTRICTION OF CHEMICALS)		
	Status of the product	Status per substance
Caprylic/Capric Triglyceride	Exempted	Substances intended to be used in medicinal products (human and/or veterinary use) are exempted from the main provisions on registration, evaluation and authorization, under REACH regulation.

11.2. Food/Nutraceutical/Dietary supplement applications

Medium chain triglycerides have a long history of use worldwide as food additives for use in food, nutraceutical products and dietary supplements. Medium chain triglycerides are edible fat, allowed for use both as a food and in foods added as ingredients. Medium chain triglycerides are widely used for parenteral nutrition in individuals requiring supplemental nutrition in particular in the US and Europe. (Specific regulations may apply in case of parenteral nutrition use.)

The Food additive details are given for information. This grade is manufactured according to IPEC-GMP and not according to HACCP requirements.
